

WESTERN DIAGNOSTIC IMAGING SYSTEMS

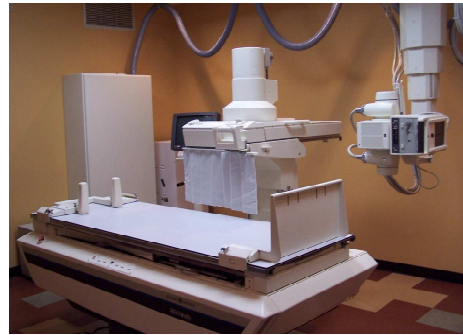

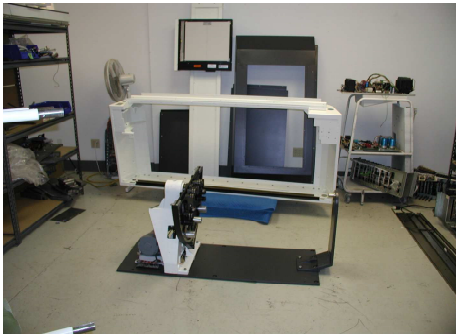

WDIS

WESTERN DIAGNOSTIC IMAGING SYSTEMS is a unique non-proprietary medical imaging integration and custom engineering firm that provides **low cost** diagnostic imaging systems from original radiographic equipment suppliers across a wide spectrum of current technology.

WDIS has become a diverse provider of **NEW, USED/REFURBISHED and/or REMANUFACTURED X-Ray** equipment to supply all market levels of the diagnostic imaging industry.

This capability together with Information Technology products ranging from Teleradiology to fully featured Imaging Informatics [IHE class] systems affords a dynamic imaging component for **WDIS** clients.

SMART SPACE TECHNOLOGY

WDIS, as a Medical Dealer/Distributor, integrates and services many high quality radiology products. Featured among these are products offered by such industry leaders as CMT RF Digital Systems; CPI Rad Vision Digital Systems; Villa-Apollo Remote RF Systems; Arcoma OTC/table systems; Sedecal Universal C-arm/table systems and IDC, IMIX, Canon, Trixell, Varian and Acceleray Digital Radiographic Systems. All **SMART SPACE TECHNOLOGY** products are integrated with customer preferred Static and Dynamic Flat Panel Detectors or CCD technology. In addition to **Southern California,** **WDIS** maintains customer accounts located in **Arizona, Oregon, Washington and Texas.** **WDIS** provides post installation application training to users and maintains a parts depot at our headquarters in Riverside, CA.

Excellent Performance + Imaging Quality =s WDIS

Western Diagnostic Imaging Systems 4110 Tigris Way, Riverside, CA 92503 Ph: 951-582-9698 Fax: 951-582-9702

Western Diagnostic Imaging Systems [WDIS]

SMART SPACE DR PROVIDES FAST (LESS THAN 3 MOS) OSHPD REVIEW*, REDUCED OPERATING COSTS AND INCREASED PROFITABILITY [*California]

WDIS MEANS CONSTRUCTION COST SAVINGS

NO CHANGE IS REQUIRED IN THE EXISTING ROOM INTEGRITY REGARDING ELECTRICAL, MECHANICAL OR STRUCTURAL COMPONENTS!!

LOW COST IMAGING

WDIS purchases Imaging Technology from the same original manufacturers that supply OEM corporations these components at wholesale pricing

DIGITAL RADIOLOGY GROWTH

It is expected that 80% of medical facilities will acquire DR technology within the next five years

ADMINISTRATORS AND DIRECTORS:

Western Diagnostic Imaging Systems (WDIS) of Southern California would like to discuss new digital imaging technology with you that will enhance your practice, lower the cost of digital X-ray imaging procedures and room renovation budgets.

Lower your bottom line expense :: Call WDIS

The **Smart Space DR technology from WDIS**, a non-proprietary custom engineering firm, provides **low cost** Digital Imaging Systems from original equipment suppliers across a wide spectrum of radiographic technology.

WDIS is a leading Dealer Installation and Service Organization representing digital X-ray systems in California, Arizona, Oregon, Washington and Texas.

We would be pleased to meet with you to discuss an opportunity to provide Radiographic solutions with a mindset towards **capital equipment cost reduction**. The following company logos represent WDIS product affiliations.

WDIS SMART SPACE DR TECHNOLOGY

The CMT SmartSPOT PrimaX RF Digital PHOTOSPOT System is a proven concept in digital imaging for today's Radiographic and Fluoroscopic (RF) systems, providing a flexible and inexpensive solution without sacrificing features and performance. Similar systems are bound by rigid, inflexible software and hardware standards. SmartSPOT breaks away from these limits with a streamlined, software-based solution, which evolves through simple software upgrades eliminating the cost of proprietary image processing hardware. SmartSPOT combined with WDIS custom engineering techniques provides your facility approved IHE quality diagnostic imaging.

Due to its flexible architecture SmartSPOT can replace conventional spot film techniques and through a fully customizable GUI, the system offers the ability to view digital fluoroscopic images immediately, providing excellent image quality.

WDIS is a leading Digital Radiology Equipment Integration and non-proprietary Custom Engineering firm that provides LOW COST Digital Imaging Systems from OEM suppliers across a wide spectrum of technology.

This new approach, **Smart Space DR from WDIS**, is a viable option for all levels of healthcare, from the largest hospitals to small community hospitals with limited budgets. Orthopedic Centers and Independent Diagnostic Testing Facilities will also benefit from this innovative development.

- Advanced Smart Space DR Technology enhancement by WDIS beats OEM purchase expense, lowers cost of ownership, decreases radiation dose, improves workflow efficiency and increases patient throughput.

- ☼ CT
- ☼ MRI

Western Diagnostic Imaging Systems [WDIS] is located in Riverside, CA.

HEADQUARTERS:

The facility is comprised of 10,000 sq. ft. which includes **SMART SPACE DR, CR, IMAGING INFORMATICS [RIS/PACS], Mammo, US, and RAD- R/F** staging areas together with a paint shop, shipping, repair shops, planning, showroom and administrative offices.

PROJECT MANAGEMENT:

WDIS also provides Radiology Project Management to include equipment purchasing [new and/or remanufactured] combined with architectural planning for tenant improvement of a new addition or renovation.

FINANCE:

Competitive project financing is also available.

- **We utilize existing hospital infrastructure to comply with OSHPD requirements in California to avoid costly construction costs.**
